

WELCOME TO METRIXTOKEN

A DIGITAL CURRENCY REVOLUTIONIZING PAYMENTS

WWW.METRIXTOKEN.COM

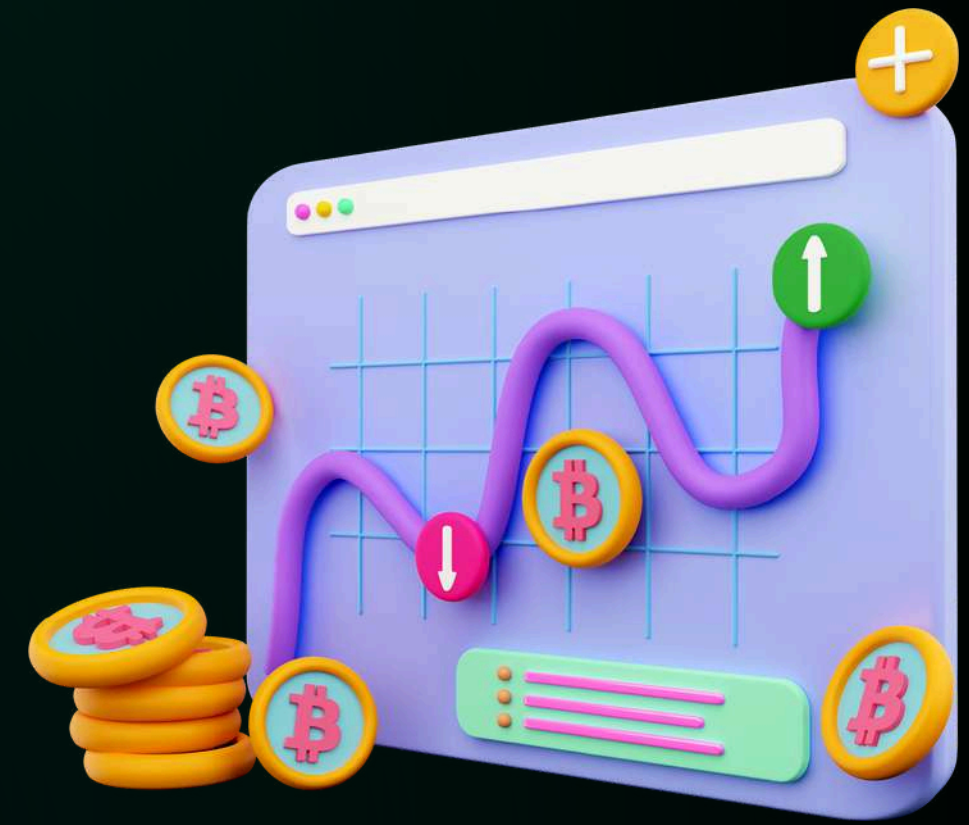

About Us

Metrix Token (MET) is a decentralized digital asset designed to empower individuals and businesses with fast, secure, and low-cost transactions across the blockchain. With a strong focus on real-world utility, community growth, and innovative staking systems, MET is not just a cryptocurrency — it's a complete ecosystem for smart earning and secure digital finance.

What is Cryptocurrency?

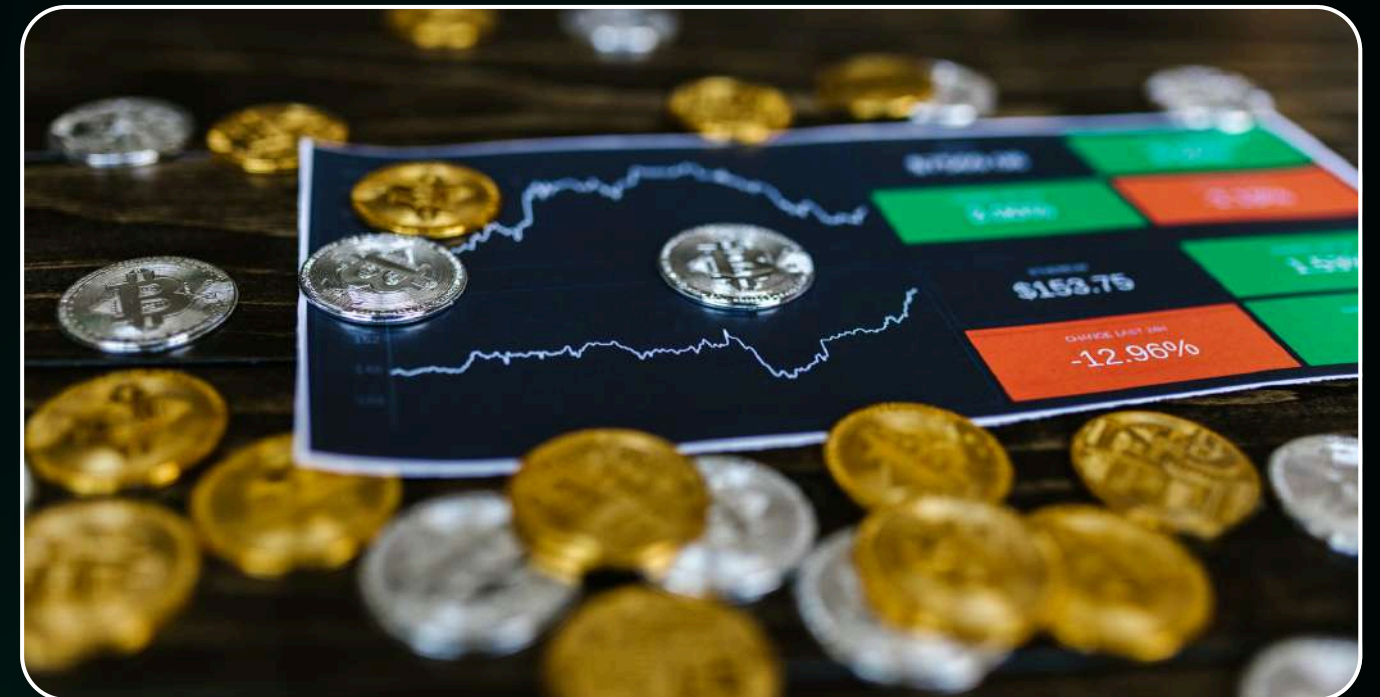

Cryptocurrency is a type of digital or virtual currency that uses cryptography for security. Unlike traditional money issued by governments (like dollars or rupees), cryptocurrencies are decentralized — meaning they operate on a peer-to-peer network without needing a central authority like a bank.

What is Cryptotrading?

Crypto trading is the act of buying and selling cryptocurrencies with the aim of making a profit. Just like trading stocks or forex, traders try to buy low and sell high — but in this case, they are trading digital assets like Bitcoin, Ethereum, and other cryptocurrencies.
